

7 Reasons why CATIA V5 users choose the 3DEXPERIENCE Platform

Below are **7 reasons** why CATIA V5 users make the connection to the 3DEXPERIENCE Platform.

1 SHARE DESIGNS EASILY AND SECURELY

Share **CATIA V5** designs with anyone, anywhere and at any time on any web-enabled device. Provide greater visibility of your design work.

2 COLLABORATE MORE EFFECTIVELY

Collaborate in the digital mock-up process with every stakeholder regardless of locations, even non-CAD users. Deliver greater innovations with a truly collaborative design process.

3 LEVERAGE MORE CAPABILITIES

Seamlessly use **CATIA V5** models within Dassault Systèmes's applications such as finite element analysis and digital manufacturing planning. Realize the benefits of digital continuity.

4 MANAGE INNOVATION PROCESSES WITH EASE

Integrate the design process into full product lifecycle management from design to validation, manufacturing, and change management. Simplify work flows and become more efficient.

5 SAVE TIME SEARCHING

Find and access data more quickly with indexed searches, 3D volume queries, product filtering and selective opening of partial assemblies. Spend more time on design.

6 BOOST PERSONAL PRODUCTIVITY

Use background save capabilities and work on other tasks in other applications while **CATIA V5** files compile and save in the background. Improve personal productivity.

7 CONNECT TO THE FUTURE TODAY

Continue to use **CATIA V5** while gaining access to the 3DEXPERIENCE platform on the cloud. No need to translate or migrate data. For example, improve communication with highly realistic renderings or reviews in virtual reality.
